

DESIGN FOR SUPERIOR SUSTAINABILITY AND BUILDING EFFICIENCY

Enable your sustainability conscious clients while hitting the mark of your regimented developers. Radically increase comfort and durability at the same time while streamlining construction for bottom line cost advantages.

Fabricated off-site and delivered ready to assemble, HercuWall is the panelized shell and demising wall system that eliminates costly and time-consuming steps. Delivers R31 insulation for up to 40% energy savings and provides superior strength and comfort.

Whether your client wants to reduce energy use, protect forest resources, or just limit their own exposure to risk, HercuWall is the intelligent option. HercuWall's uniquely simple structure is ICC-compliant and reduces dependency on wood by up to 60%.

- A Concrete**
- B ShearStrip™**
- C Polyester Film (PET)**
- D Insulating Foam (EPS)**

MINIMIZE ENVIRONMENTAL IMPACT

Saving up to 40% on energy consumption and eliminating more than half of the wood needed, HercuWall takes a whole life-cycle approach to sustainability. From sourcing raw materials through to design, building use and end-of-life waste management, we maximize recycling and waste reduction as well.

HercuWall is Ideally suited for:

- **Build-to-rent**
- **Hospitality**
- **Multifamily**
- **Assisted living**
- **Institutional housing**

FULLY DIGITIZED PREDICTABILITY AND REPEATABILITY

From design and drafting to manufacture, delivery and installation our AlignedAssembly™ methodology replaces the guesswork and rework of stick with planned precision, rapid, repeatable execution and simplified, safer handling.

- **Value engineering**
We consult with you to optimize utilization of HercuWall within your plans.
- **Digitization**
Proprietary software converts your plans to HercuWall shop drawings — used to manufacture precisely sized and cut panels.
- **Numbered**
Each panel is numbered for easy installation.
- **Delivery**
Panels are delivered to the site in order ready for install.

TEAM UP WITH HERCUWALL TO DESIGN FOR GREATER SUSTAINABILITY.
